ESSENTIAL STI RESOURCE

Established in 1946, the IACs have provided rapid access to relevant Scientific and Technical Information (STI) to answer critical questions in support of the DoD mission. Today, the DoD IAC helps customers utilize existing STI and drive innovation across the DoD with technical analysis and development of materiel solutions.

BROAD FOCUS AREAS

The DoD IAC established 22 Technical Focus Areas (TFA), each critical to the needs of the DoD, and are mapped to one of three domain areas: Defense Systems, Cyber Security and Information Systems, and Homeland Defense and Security.

UNPARALLELED EXPERTISE

The DoD IAC provides customers with access to information, knowledge, and best practices via a network of Subject Matter Experts (SME) that are available to answer technical questions and perform specialized research and analysis.

COMPREHENSIVE SERVICES

The DoD IAC is chartered by the DoD to provide Research and Analysis services and Agile and Scalable Contracting services through integrated Scientific and Technical Information (STI) development and dissemination, studies and analyses, and other scientific and technical activities.

STREAMLINED APPROACH

In 2018, the DoD IAC consolidated three Multiple Award Contracts (MAC) into one IAC MAC with a nine year order period and \$28B ceiling. Instead of three MACs divided into three domain areas, the IAC MAC is a single MAC encompassing all 22 TFAs. As a result, the IAC MAC will provide greater flexibility and benefits to the greater S&T community.

ECMS

Customer
Briefs

- ⚙️ The DoD establishes IACs to acquire, digest, analyze, evaluate, synthesize, store, publish, and distribute STI and engineering data in a clearly defined specialized field or subject area of significant DoD interest or concern.
- ⚙️ DoDM 3200.14 Volume 2, (Principles and Operational Parameters of the DoD STIP: Information Analysis Centers (IACs) (2017)) describes the DoD IAC Program and implements its policy, principles, and concepts for procedural functions.
- ⚙️ IACs are an integral part of the DoD STIP.
 - IACs are distinguished from technical information centers or libraries. Center or library functions are concerned with providing reference to or access to technical documents themselves or technical information databases. IACs use a technically expert staff to assess and provide relevant technical information to meet a specific user need.
 - Although an IAC normally maintains document or database collections, a significant differentiating aspect of an IAC is the use of scientists and engineers in an IAC-defined field or subject area to perform many of the IAC functions.
 - IACs are established to support the DoD Acquisition Enterprise.

Basic or Core Activities. IACs are staffed with scientists, engineers, SMEs, and information specialists to provide users with focused expert assistance and unbiased STI. They:

- Establish and maintain comprehensive knowledge databases that include technical, scientific, and other data and information collected on a worldwide basis in their fields of interest.
- Identify sources and assess the relevance of data held by others.
- Coordinate closely with their sponsoring DoD technical communities and the DoD user community in general as a means to focus their efforts on topics of interest or concern to the DoD.
- Collect, maintain, and develop analytical tools and techniques, including databases, models, and simulations.

IACs provide in-depth analysis services and create specialized technical information products. IAC products are made to be reused to perform additional or special activities or tasks. IAC products and services include, but are not limited to:

- Abstracts and indexes.
- Technical and bibliographic inquiry services.
- Technical assessments.
- Support and promotion of exchanges of information.
- Preparation of state-of-the-art reports.
- Data Sets.
- Handbooks and Data Books.
- Critical reviews.
- Standards and technology benchmarks.
- Problem definitions.
- Alternative technology analyses.
- Current awareness activities.

“The DoD IAC Basic Centers of Operation (BCO) perform the basic or core activities and their products are made to be reused to perform additional or special activities or tasks.”

Chartered IAC Functions (Special Activities or Tasks)

DoDM 3200.14 Volume 2

DoD IAC Overview	IAC MAC Overview	Small Business	TO Award Process	TO Execution	ECMS	Customer Briefs
-------------------------	------------------	----------------	------------------	--------------	------	-----------------

Additional or Special Activities or Tasks. IACs are established with the explicit intent to perform additional tasks within its technical focus areas above and beyond the basic or core activities.

- These additional or special activities or tasks build on basic or core activities and provide an efficient method of enhancing the effectiveness of the technology base.
- Those additional tasks or special activities are task orders that are specifically defined by a customer as the need arises and are consistent with the area of competence and concern that defines the technical focus areas of the DoD IAC. The customer provides the funds necessary to perform the task order.

“The DoD IAC established the following agile and scalable contracting services for executing additional or special activities or tasks. All STI created is added to the DTIC Library and made available to the DoD and greater S&T community.”

Scientific and Technical Information (STI)

**DoD IAC
Overview**

IAC MAC

Business

TO Award
Process

TO
Execution

ECMS

Customer
Briefs

- ⚙️ **STI is defined as “Communicable knowledge or information resulting from or about the conduct and management of scientific and engineering efforts.**
 - STI may be represented in many forms and media, including paper, electronic data, audio, photographs, video, drawings, numeric data, textual documents, etc.”

- ⚙️ **Task Orders result in creating new STI, which is added to the IAC STI repository after quality control checks performed by the appropriate IAC BCO(s), based on the technical focus of the STI and the domain(s) with which it aligns.**
 - The STI and other products and services provided under task orders are intended to increase the productivity of the RDT&E community, the Acquisition community, and other scientific and engineering groups working for the DoD.

- ⚙️ **All STI generated under the IAC MAC will be made available to the DoD and greater S&T Community.**
 - All IAC MAC generated or collected STI (e.g. Final Technical Report and other technical data thereto) shall be provided to the COR and/or Task Order Alternate Contracting Officer’s Representative (ACOR) for inclusion in the DTIC STI repository.
 - The DoD IAC PMO will coordinate with the RA for release of such data and/or information. This will be further defined per task order.

Strategic Sourcing Success

DoD IAC Overview	IAC MAC Overview	Small Business	TO Award Process	TO Execution	ECMS	Customer Briefs
-------------------------	------------------	----------------	------------------	--------------	------	-----------------

Restructured the IACs from 3 MACs to a single IAC MAC vehicle

**Reduces Contract Award Time.
Reduces Problem of Scope Ambiguity.**

Accomplished these objectives:

- Comply with the 2018 NDAA
- Support top priorities of the SecDef
- Increase synergy across related technology areas
- Increase opportunities for small businesses
- Lower cost & improve quality through enhanced competition
- Expand the industrial base accessible through the IACs

Continue to increase efficiencies in consolidating from 3 MACs to 1

FY18 DoD IAC Funding by Service/Agency

FY18 DoD IAC Funding by Organization Type

FY18 Successes

- **11.71% cost avoidance measured on task orders issued under the new strategic MAC vehicles**
 - \$2.02B in Awarded Ceiling
 - \$1.88B in obligated funding
 - \$268M cost avoidance realized
- **Approach includes "several best practices for the Department"** (per memo signed by Director, Defense Pricing and Contracting – DPAC)

Organizational Conflicts of Interest (OCI)

- An OCI is present when an **IAC MAC prime Contractor or subcontractor also holds one or more IAC Basic Center Operations (BCO) contracts.**
 - The Government is avoiding this risk entirely by not allowing a BCO prime Contractor to also be a prime/subcontractor on this IAC MAC IDIQ contract.
- Another conflict may be present when an **IAC MAC prime Contractor or subcontractor is also a subcontractor to a BCO contract.** As OCIs are identified in the course of awarding (1) this IAC MAC, (2) task orders under this contract, or (3) BCO contracts.
- The Contracting Officer shall take action to avoid, mitigate, or neutralize such OCI as required under FAR Subpart 9.5.

DoD IAC PMO Contractors awarded by AFICA/KD Contracting Officer Mr. Stanley Stearns for supporting the DoD IAC PMO

- **DoD IAC PMO Support Contractor:**
 - Cloud Lake Technology, LLC. Contractor does not have access to any Offeror's proprietary information nor do they evaluate or advise for any source selection work and they have non-disclosure agreements. Furthermore this contractor's parent companies (NANA Development Corporation and Akima LLC) are prohibited from priming or subcontracting on any DoD IAC work.
- **Basic Center Operation (BCO) Contractors:**
 - Cyber Security Information Analysis Center BCO (CSIAC BCO): **Quanterion Solutions Inc.**
 - Defense Systems Information Analysis Center BCO (DSIAC BCO): **Survive Engineering Company, LLC.**
 - Homeland Defense Information Analysis Center BCO (HDIAC BCO): **Information International Associates.**

An Indefinite Delivery Indefinite Quantity (IDIQ) Multiple Award Contract (MAC) for RDT&E services, other R&D-related analytical services, and development of doctrine, tactics or plans. Awarded 30 September, 2018 with a nine-year ordering period and \$28B ceiling

⚙️ Features

- Fast, flexible, and low cost (**1% FY19 CSDC**)
- Incremental Funding for severable orders
- Up to five year (60 month) Task Order PoP
- No minimum or maximum task order ceiling
- Allows all contract types
- Can be classified and Unclassified
- CONUS and OCONUS (Including in-theater and contingency operations areas)

⚙️ Scope

- For RDT&E services, other R&D-related analytical services, and development of doctrine, tactics or plans
- Provides advanced research and analysis to the DoD RDT&E, Acquisition communities, and Combatant Commands
- Covers all 22 Technical Focus Areas

- ⚙️ **The total of all Task Orders issued to the multiple award contract holders collectively under the IAC MAC contracts shall not exceed the maximum ceiling amount of \$28B.**
 - The Government may provide all contract holders an annual notification of the total remaining IDIQ contract value available for award.
- ⚙️ **The first task order for IDIQ minimum order guarantee for \$3,600, CLIN 0001, will be issued concurrently with the IAC MAC IDIQ contract award.**
 - AFICA/KD, will administer this contract and is the centralized ordering office.
- ⚙️ **Actively market/promote the IAC MAC in accordance with the Contractor's Marketing Plan, and in accordance with the initial TO(s) issued.**
 - The Contractor's acceptable marketing plan was incorporated into the first TO (aka "Marketing Plan" order) issued at time of contract award and forms the basis for the first TO.
 - This TO was issued on behalf of, and funded by, the DoD IAC to execute the Marketing Plan and satisfies the IDIQ minimum ordering guarantee for each contractor.

ASSISTANT
DIRECTOR
DIRECTOR

SUBJECT: Preferred Use of Department of Defense Information Centers (DoD IAC) Contracts

First established in 1946, the Centers (IAC) continue to serve as a critical source of technologies to support current and future operations by providing value in maximizing the utility of DoD knowledge re-use and building upon information.

The DoD IACs operate across the Department, managing over 230 task orders each year (FY) 2017. Through the DoD IAC program, we answer recurring technical challenge Government requirements.

The IAC program incorporates best practices and user-friendly acquisition of advanced technologies.

- Open to all DoD components
- Full service assisted acquisition
 - Customer Support Statement (PWS)
 - Dedicated contract and Evaluation simulation, test and Post-award support
 - Correct billing
- Task orders that are full service with levels ranging from \$100,000 to \$10,000,000

- Pre-vetted contract performers, industry leaders in their fields
- Rapid turnaround of incremental funding on task orders, and the ability for sharing of task orders across customers, speeding execution of work
- Knowledge re-use that relies heavily on knowledge-mining in the over four million technical documents of the Defense Technical Information Center
- All at a low cost to the user, 1.2 percent in FY 2018.

These best practices result in a rapid acquisition process that can be readily tailored to many different problems and scenarios, meeting the diversity of technical challenges faced by DoD users.

The DoD IACs offer several multiple award, indefinite delivery/indefinite quantity contracts (MAC IDIQ) to meet this broad need (to become a single MAC IDIQ by FY 2019), covering these scope areas:

Advanced materials	Homeland Security & Defense
Alternative Energy	Information Sharing & Knowledge Management
Administrative Systems	Intelligence
Biometrics	Military Sensing
Chemical, Biological, Radiological, and Nuclear (CBRN) Defense	Modeling & Simulation
Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR)	Non-lethal Weapons and Information Operations
Critical Infrastructure Protection	Reliability, Maintainability, Quality, Supportability, and Interoperability (RMQSI)
Cultural Studies	Software & Data Analysis
Cyber Security	Survivability & Vulnerability
Directed Energy	Weapons Systems
Energetics	

In continuing the policy of our predecessors established in January 2015, we encourage Requiring Officers and Contracting Officers to use the IACs as best value vehicles to acquire services that fall within the applicable scope areas. In developing acquisition strategies, all new and ongoing efforts should consider the DoD IAC contracts as vehicles of first choice.

Additional information on the DoD IACs can be found at <http://iac.dtic.mil/>. Questions regarding this action memorandum can be directed to the DoD IAC's Director, Mr. Thomas Gillespie, at 703-767-9235 or thomas.c.gillespie.civ@mail.mil.

Shay R. Assad
Director, Defense Pricing and Contracting

Mary J. Miller
Performing the Duties of the
Assistant Secretary of Defense
for Research and Engineering

2

Defense Pricing and Contracting (DPAC) sent a memo, co-signed by Ms. Mary Miller, Performing the Duties of the Assistant Secretary of Defense for Research and Engineering ASD(R&E).

Identifies the IAC contracts as “best value vehicles.”

Encourages requiring activities and contracting officers across DoD to consider the IACs as “vehicles of first choice.”

The memo promotes utilization of DoD IACs to the maximum extent practicable for technical research and analysis requirements.

ECMS

Customer
Briefs

⚙️ The Government reserves the unilateral right to Off-Ramp non-performing Contractors.

- Contractors that are Off-Ramped will not be eligible to compete for new TOs in the Pool from which they are Off-Ramped, but will be required to continue performing active task orders until the period of performance of such orders ends.

⚙️ Examples of non-performance, includes, but is not limited to:

- A Contractor does not meet minimum requirements for participating in task order competitions as described in PWS paragraph 4.4 (Minimum Task Order Proposal Submittals).
 - **Must submit at least one TO proposal for all its pools combined**
 - A Contractor does not meet the small business subcontract goals established in PWS paragraph 4.5 (Small Business Participation Goals) and their Small Business Participation Plan (**Pool1: 13% and Pool 3: 9%**).
- Unsatisfactory CPARS rating(s).

⚙️ The Off-Ramp methods include, but are not limited to:

- Contracting Officer determines that exercising an Option is not in the Government's best interest, therefore the Government would allow the Contractor's contract term to expire.
- Debarment, suspension, or ineligibility as defined in FAR Subpart 9.405-1, 9.405-2.
- Termination as defined in FAR Part 49.402, 49.403.

TO Award
Process

TO
Execution

ECMS

Customer
Briefs

- ❁ **The Government reserves the unilateral right to reopen competition or “On-Ramp” additional Contractors in any competition Pool at any time during the term of the contract.**
 - The Government may choose to On-Ramp any number of new awardees when the Contracting Officer determines it is in the Government’s best interest to do so in order to enhance the competitive environment of TO solicitations under the originally awarded IAC MAC IDIQ contract.
 - This may be due to any reason, including the lack of robust competition for TOs or a shrinking of the competitive Pool of original effective IDIQ awardees under this solicitation.

- ❁ **When an On-Ramp is used, the Government will advertise the reopening of the competition on www.FedBizOpps.gov, and awardees shall meet the criteria established in the initial IAC MAC solicitation for the respective Pool; this includes all evaluation criteria for that Pool.**
 - The evaluation and selection of awardees for any On-Ramp will be based upon substantially the same evaluation and award criteria used for the IAC MAC initial basic contract awards for the respective Pool.
 - The anticipated number of awards for any Pools of competition will be announced in the reopening announcement posted to FedBizOpps.

- ❁ **Any additions due to On-Ramps will be co-terminus with the existing term and not impact the contract maximum ordering ceiling and the ordering period for new awardees and will not exceed the overall maximum term of the original ID/IQ contract, including options.**

- ❁ **The Government will not consider unsolicited requests for addition to any competition Pools.**

Subcontracting Performance

- Measured on an annual basis (based on Fiscal Year)
- Based on ALL combined TOs awarded.

Small Business Goals:

- Based on the percentage of total dollars obligated to small business
 - During the evaluation period (Fiscal Year) and on a total cumulative basis, **NOT** just subcontracted dollars.
- Data obtained from the eSRS reports and the Monthly Contract Cost Tracking Report deliverable (A001)
 - Data will be assessed and the results will be reflected in an annual assessment using the Contractor Performance Assessment Reporting System (CPARS).
- **Goals by Pool (13% for Pool 1 and 9% for Pool 3)**

We highly encourage the Pool 1 & 3 Contractors to team with the Pool 2 awardees that have been thoroughly vetted to meet their obligated subcontracting goals.

PRE-AWARD STI LITERATURE SEARCH

DoD IAC
Overview

IAC MAC
Overview

Small
Business

**TO Award
Process**

TO
Execution

ECMS

Customer
Briefs

The BCOs conduct STI literature searches for all new IAC MAC task orders.

- Literature searches will be accomplished at the request of the COR and be performed by the BCO most closely affiliated with the scope of the task order, as determined by the COR.
- These searches shall be conducted during the task order's pre-award /requirements planning stage using the DTIC repository, IAC STI databases ,and other resources deemed relevant by the BCO.
- The search will identify, by PWS task, existing STI relevant to the work being performed under the task order. The STI found by the literature search is intended to shed light on the challenge(s) presented in each PWS task and shape the requirements and technical approach of the task order.
- The Literature Search is provided to the IAC MAC Prime at time of award and is intended to support task order execution.
- The pre-award STI Literature Search is the baseline used for the annual STI GAP Analysis (A011) conducted by the IAC MAC primes.

DoD IAC
Overview

IAC MAC
Overview

Small
Business

**TO Award
Process**

TO
Execution

ECMS

Customer
Briefs

RA Conducts
Proposal
Evaluation

Proposal Evaluations:

- Upon receipt of the proposals, the Technical Evaluators will evaluate proposals against the Factors and Subfactors specified in the FOPR.
- **Best value determination:**
 - The Government will make a best value determination based on one of the following:
 - **Tradeoff:** Described in FAR 15.101-1. This process allows for a tradeoff between non-cost factors and cost/price, allowing the Government to accept other than the lowest priced proposal or other than the highest technically rated proposal to achieve an overall best-value contract award. For the purposes of these ordering procedures, non-cost factors will be significantly more important than cost/price.
 - **Lowest Price Technically Acceptable (LPTA):** Described in FAR 15.101-2. The LPTA process is appropriate when best value is expected to result from selection of a technically acceptable proposal with the lowest evaluated price. Evaluation criteria are of a pass/fail nature.
- **If only one offer is received:**
 - The Government will not perform a best value evaluation of the proposal, but rather:
 - Evaluate the Offeror's proposed Mission Capability for technical acceptability,
 - Evaluate the proposed cost to determine a fair and reasonable price, and
 - May negotiate with the sole Offeror.

Press Release

[DoD IAC Overview](#)[IAC MAC Overview](#)[Small Business](#)[TO Award Process](#)[TO Execution](#)[ECMS](#)[Customer Briefs](#)

⚙️ Required Information

- Reference the IAC MAC and AFICA (...was awarded a \$XXM task order under the DoD Information Analysis Center Multiple Award Contract (IAC MAC) by the Air Force Installation Contracting Agency.”
- Include the following “**About the IAC Program**” language:

- **About DoD IAC Program:**

The DoD IAC program operates as a part of Defense Technical Information Center and provides technical data management and research support for DoD and federal government users. Established in 1946, the IAC program serves the DoD science & technology (S&T) and acquisition communities to drive innovation and technological developments by enhancing collaboration through integrated scientific and technical information development and dissemination for the DoD and broader S&T community.

⚙️ Submission Instructions

Execution

ECMS

Customer
Briefs

⚙️ Adding Subcontract whose estimated cost is or will become greater than 5% of total TO cost:

- Obtain written consent of the Contracting Officer.
- Unless a lower threshold is stipulated in the Task Order.
- Provide the Contracting Officer with a written courtesy notification of all ACOR technical approvals of Subcontracts for services.

⚙️ Adding Subcontract whose estimated cost is less than 5% of total TO cost and greater than the Micro Purchase threshold:

- Obtain written technical approval of the ACOR
- Obtain written technical approval of the ACOR to increase the value of any Subcontract
- Provide the Contracting Officer with a written courtesy notification regardless of dollar amount.

⚙️ NOTES:

- Consent and approval of a Subcontract on a particular Task Order applies only to that Task Order.
- Provide Contracting with courtesy copies of ACOR approvals of Subcontracts for services
- Obtain Contracting Officer consent required only once
- Subcontracts which were priced in your FOPR proposal will be listed in the Task Order award, and are deemed to have been consented to by the Contracting Officer
- Don't forget requirement to select subcontractors (including suppliers) on a competitive basis (FAR 52.244-5 Competition in Subcontracting)
- Don't forget requirement to notify the government when subcontract costs exceed 70% of the total cost of work (FAR 52.215-23 Limitation on Pass-Through Charges)

Briefs

RA Deliverables-Identified via the Task Order PWS:

- **STI Repository & Non-STI Deliverables (CDRL A007)**
 - Requires the contractor to deliver data items, both STI and non-STI to the Requesting Activity (and STI only to DTIC, via the IAC BCO)

RA and DoD IAC Task Order Specific Deliverables:

- **Program Management Plan (CDRL A009)**
 - A formal, approved document used to manage project execution.
 - Submit initial Plan 15 days after TO award.
 - Update PMP within 15 days of additional tasking.
 - New Project can not start without funding.
- **Monthly Status Report (MSR) (CDRL A010)**
 - Report on TO cost, schedule, and performance against PWS requirements, providing information at the TO level.
- **Final Technical Report (FTR) (CDRL A012)**
 - Covers task background, objectives, assumptions, specific data collected, analyses conducted, conclusions and recommendations (initial and final report)

DoD IAC Task Order Specific Deliverables:

- **Task Order Post-Award Orientation Slides (CDRL A008)**
 - Covers requirements, roles/responsibilities, expectations for management of cost / schedule / performance, and others.
- **TO-Specific Annual STI Gap Analysis (CDRL A011)**
 - Using the pre-award Literature Search, identify knowledge gaps in performing the TO
- **Contract Manpower Reporting (CMR) (CDRL A013)**
 - Report of ALL Contractor labor hours (including subcontractor, independent consultant and wholly owned subsidiary labor hours)

Select "Submit IAC STI" to input data for new STI submission.

Electronic Document Submission (Unclassified)

DEFENSE TECHNICAL INFORMATION CENTER

Select the function you want to perform:

- Submit IAC STI 
- Edit/Review/Approve/Reject IAC Submission 
- Run Reports 

Or access the site via the DoD IAC Website and click on "SUBMIT STI"

The screenshot shows the DoDIAC website homepage with a navigation menu at the top. The "SUBMIT STI" link is circled in yellow. The main content area features three columns of services: "ELIMINATE REDUNDANCY RESEARCH & ANALYSIS SERVICES", "FOSTER COLLABORATION", and "STIMULATE INNOVATION AGILE & SCALABLE CONTRACTING SERVICES". Each column includes a brief description and a "Learn More" button. The DoDIAC logo is prominently displayed in the center.

BREAK (10 MINUTES)

Rapid Equipping Force (REF)

Mr. Andrew Yuliano

U.S. Army Rapid Equipping Force

Post-award Orientation for the IAC MAC Contract
Mr. Andrew Yuliano

24 OCTOBER 2018

How Does REF Use IAC Task Orders?

Assess – Equip – Insert – Inform

- **BLUF:** REF uses its IAC Task Orders for unique efforts that may require significant analysis, development, prototyping, integration, management, and/or sustainment.
- Most will result in deployment of the technology; some will not and are done for proof-of-concept, comparison, or technology development purposes.
- The vast majority of REF projects **do not** fit as IAC Task Order projects. For Commercial-off-the-shelf (COTS) procurements, we use other contract vehicles or means (i.e. Defense Logistics Agency contracts or Government Purchase Card).

REF Legacy IAC Task Orders

Assess – Equip – Insert – Inform

- Weapon Systems Technology Information Analysis Center (WSTIAC) – Alion – 2013-2015
- Military Sensing Information Analysis Center (SENSIAC) – Georgia Tech Research Institute – 2012-2015
- Survivability/Vulnerability Information Analysis Center (SURVIAC) – Booz Allen Hamilton – 2012-2015
- Reliability Information Analysis Center (RIAC) – Wyle – 2013-2016
- Advanced Materials Manufacturing & Testing Information Analysis Center (AMMTIAC) – Alion – 2014-2016

Current and Future IAC Task Orders

Assess – Equip – Insert – Inform

- Homeland Defense Technical Area Task (HD TAT) – SAIC – 2016 – 2021
 - Currently in Option Year 2 of 4
 - One prototyping / development effort (small man-portable power conditioner / storage system for Tactical Operation Centers)
 - Numerous analysis efforts between REF and other agencies. Areas include: force protection, training, capability gap analysis and development, and project management
 - Since REF is very requirements-driven, a portion of ceiling has been reserved for fulfillment of emerging capability gaps
- As we approach FY21, REF will assess the need for a new IAC Task Order.
